

- (i) Products to be sold should be a 'Single Brand' only.
- (ii) Products should be sold under the same brand internationally.
- (iii) 'Single Brand' product-retailing would cover only products which are branded during manufacturing.

(c) The policy is expected to encourage sourcing from India and provide market access to domestic suppliers. As branded products cater to the brand conscious middle-class clientele, existing small retailers are not likely to be affected by allowing FDI in the retail trade of 'Single Brand' products. Allowing FDI in retailing of 'Single Brand' products would, while meeting the growing demand of such products, also bring in investments and provide access to modern technology and best practices not only in retailing but also in related support services, and in developing supply chain logistics.

(d) Government remains committed to initiating, where necessary, suitable measures for safeguarding the legitimate interests of the Indian Industry & consumer.
